Mission

To harness the power of high quality sports infrastructure to inspire every individual towards active lifestyle

Vision

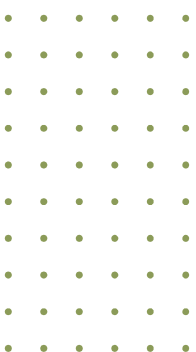

To become the most standardized and premium sports infra projects and material brand that imparts trust and quality in every customer

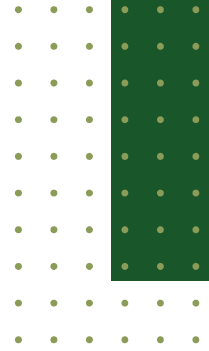

PROCESS

- PLAIN CONCRETE CEMENT SUB BASE
- FABRICATION USING MS PIPE
- HDPE NETTING FOR FENCING
- ROOF NETTING FOR TOP
- PADDING AND CUSHIONING OF POLES
- LIGHTS FIXTURES
- ARTIFICIAL GRASS FOR SPECIFIED SPORTS

OUR PROCESS

- **PLAIN CONCRETE CEMENT SUB BASE**

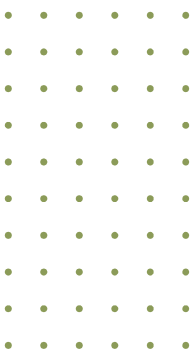

- We provide various sub bases with utmost precision and accurate measurements without compromising on the quantity and quality.

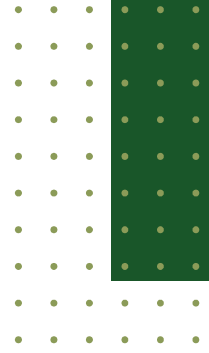

some examples are :

- dynamic sub base
- asphalt sub base
- concrete base

- PCC Civil Base :

- After mati puran the first step is to make a M15 grade concrete using 4inch channel, then the subbase is cured for drying and slope is formed as per clients and area requirement for water drainage and dispo

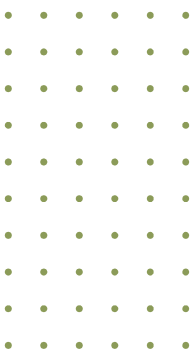

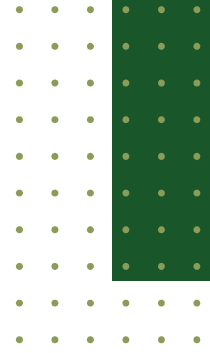

OUR PROCESS

- **FABRICATION USING MS PIPES**

- Our fabrication is done using MS ISI pipes of 4x4 inch dimension square pipe with ~4mm thickness for a sturdy and longer life
- It is installed using ms rooting with excavation depending on the decided pipe length
- all poles are installed at a distance of 13-14 ft and then welded with 2x2inch 2mm thickness horizontal ISI poles at top bottom and centre for strenghtening the frame
- then we add the frames for led lights on the top of the pipe
- it is then coated with redoxide paint and color as per clients choice.

OUR PROCESS

• HDPE NETTING FOR FENCING

- We are leading Suppliers and Installers of Sports Net and Safety nets across India. We Supply and Install HDPE Nets, Polypropylene Multifilament (PPMF) Nets which can be used in various Field of Applications. We provide warranty on every cricket net/ football net installation because of our superior net quality material.
- After the process of paint on the pipes we install 2.5mm thick , 35mm-50mm mesh, HDPE nets (UV STABILIZED) fit to size using 8mm pp rope on border which is interlocked on the pipe after which the lights are installed parallelly.
- We then install HDPE 1.0mm thickness top net for roof fencing.
- It is installed using pp rope support on the top for removing the sag and maintaining a straight angle
